

# Bernhard Spies

Bernhard Spies graduated in Brewing and Beverage Technology at the Technical University of Munich in Weihenstephan with a focus on process engineering.

He started his career working as a research associate at the Chair of Process Engineering of Disperse Systems and is now at the Chair of Process Systems Engineering.

The research interest of his Ph.D. thesis is the cleaning of technical surfaces. Particularly the influence of the wall shear stress and the flow conditions.

Bernhard Spies gives lectures in Hygienic Design and Material Science.

He is a member of EHEDG Training & Education Working Group.
